SUMMARY

Seasoned Full Stack Developer with 8 years of experience in both front-end and back-end development across various projects. Expertise in Javascript, React, Next.JS, Drupal, and PHP; led key initiatives like a location-based tool for hospital services. Actively seeking a Full Stack Developer role to leverage robust web development skills.

WORK EXPERIENCE

IQ Solutions   Houston, USA
Drupal Developer   Jul 2023 - Present

- Develop and maintain front-end interfaces using React and Next.js for public health websites, ensuring user-friendly navigation and ADA compliance.
- Implement back-end solutions with Drupal 10, optimizing site functionality and content management for enhanced user experience.
- Collaborate with cross-functional teams to meet the Center for Disease Control's web development needs, maintaining strict adherence to project timelines and specifications.

Decode Advertising, Houston, USA   Houston, USA
Senior Fullstack Web Developer   Feb 2022 - Jul 2023

- Revamped the corporate website interface, integrating a comprehensive resources section featuring news, articles, webinars, podcasts, and downloadable content, utilizing Javascript, Fractal, and Sass for front-end and Drupal 9 with PHP for backend development.
- Enhanced and expanded the Baylor College of Medicine's online presence by implementing new features and maintaining the existing infrastructure, employing HTML and CSS for the front end and leveraging Drupal 8 and PHP on the back end.
- Contributed to the development and integration of a location-based application designed to facilitate the connection between hospitals and essential services, using Next.js and React.js for front-end and Typescript with Node.js for the server-side.
- Collaborated with cross-functional teams to ensure project alignment with client objectives, maintaining high-quality standards throughout the software development lifecycle.

Kinshasa Digital, Kinshasa   Kinshasa
Fullstack Web Developer   Aug 2020 - Nov 2021

- Developed a comprehensive web application facilitating the management of studios, events, services, and communal areas, enhancing operational efficiency for a notable digital agency.
- Implemented front-end features using JQuery, HTML, and Sass, ensuring a user-friendly interface and seamless interaction for clients.
- Constructed robust back-end solutions with Symfony framework, contributing to a reliable and scalable platform for event and space management.
